Company Profile

Gasunie is a European gas infrastructure company. Our network ranks among the largest high pressure gas pipeline grids in Europe, consisting of over 15,000 kilometres of pipeline in the Netherlands and northern Germany, dozens of installations and approximately 1,300 gas receiving stations. Annual gas throughput totals approximately 125 billion cubic metres. We serve the public interest in the markets in which we are active and work to create value for our stakeholders. Gasunie is the first independent gas transport provider with a cross-border network in Europe and offers transport services via its subsidiaries Gas Transport Services B.V. (GTS) in the Netherlands and Gasunie Deutschland in Germany. We also offer other services in the gas infrastructure field, including gas storage and LNG. We consider the wishes of our customers to be of prime importance.

Curriculum Vitae

Robert van der Geest is Manager Operations Research at N.V. Nederlandse Gasunie. He and his team work on a portfolio of gas business consulting projects, within the company as well as for external partners of Gasunie. More in particular, Mr. van der Geest is currently responsible for a number of activities within the areas of energy efficiency and energy policy in the gas market, and environmental footprint reduction of the gas industry. Before joining Gasunie, he worked for ABB in Norway, where he developed a number of advanced model-based applications for control and optimization of offshore oil and gas production systems. Mr. van der Geest holds a PhD degree in Applied Mathematics and MA degrees in Economics and Computer Science.
